

OHIO FIRE CHIEFS' ASSOCIATION

**JULY 12-16, 2018
COLUMBUS HILTON
AT EASTON**

Course Description and Presenters Guide

A guide to the education sessions and those who are presenting at the OFCA Conference. This year's theme is *Health, Wellness & Education: Your Future Starts Today!*

OHIO FIRE CHIEFS' ASSOCIATION

COURSE DESCRIPTION AND PRESENTERS GUIDE

NOTE:

- **ALL CLASSES QUALIFY FOR HOURS TOWARDS EITHER THE OHIO FIRE CHIEF (OFC) OR OHIO FIRE OFFICER (OFO) CREDENTIALING OR RE-CREDENTIALING PROGRAM.**
- **ALL WORKSHOPS OFFERING CEU(S) MUST BE ACCEPTED AND APPROVED BY YOUR CHIEF.**
- *** DENOTES SESSIONS THAT QUALIFY FOR OHIO EMS CEU(S) THROUGH FARMERSVILLE FIRE & EMS SITE #1028.**

2015 IFC High – Piled Combustible Storage

The 2015 IFC High-piled Combustible Storage seminar provides a basic understanding of the hazards associated with high-piled combustible storage and introduces the participants to the provisions in Chapter 32 of the 2015 edition of the International Fire Code (IFC). This seminar places special emphasis on the classification of commodities and understanding the design criteria in NFPA 13 for storage. Course objectives include: Apply the requirements of Chapter 32 for high-piled combustible storage; Identify the various storage methods for high-piled combustible storage; Describe how each storage method contributes to fire behavior; Explain the basic requirements of NFPA 13, Standard for the Installation of Sprinkler Systems, 2010 edition, for storage occupancies; Describe the scope and application of Chapter 32 of the IFC; Explain the commodity classification system based on the criteria in Section 3203 of the IFC.

Presenter: Robert J. Schultz, P.E., P.S., CBO, Served as an Assistant Architect Administrator at the Ohio Board of Building Standards

Date and Time: Friday, July 13, 8:30 AM – 12:00 PM; 1:00 PM – 4:00 PM

Location: Juniper B & C

Arco Recycling Fire East Cleveland, Ohio

Over a five-day period in October 2017, the East Cleveland Fire Department, with the help of numerous mutual aid agencies conducted fire suppression operations at Arco Recycling. Construction and demolition debris had been dumped there and covered over 9 acres and was piled over five-stories high. Pockets within the pile had caught fire resulting in fire suppression efforts, in addition to involvement from County, State, and Federal resources. The workshop will cover lessons learned from several Northeast Chiefs who operated at the incident. An overview of the incident, including stakeholder concerns, will be offered along with key takeaways attendees can use if an EOC activation and expansion of the incident command system is required in their area.

Presenter: Mike Celiga, Fire Chief, East Cleveland; Brandy Carney, Director of Public Safety & Justice

Date and Time: Saturday, July 14, 2:00 PM – 3:30 PM

Location: Regent 3

Blast Stages and Injuries

This presentation is on IED's related to some of the commercial and homemade explosives used today. Since fire/medic companies are normally one of the first to respond to explosions, we need to be familiar with the various typologies and associated injuries. We enter many structures on a daily basis and are subjected to many dangers. We are also in the unique position to assist Law Enforcement when we observe any bomb-making components. We cannot report on components which we do not know may be used in IED construction unless we foster that knowledge base. Firefighters and medics alike have been known to identify various components of bombs which have thwarted terrorist efforts. Responding to lives in danger is our forte; however, helping to prevent catastrophic events is also a duty of ours. Discussed will be the blast stages and the associated injuries. Treating these injuries can be complex and difficult. The treatment focus will be on explaining the Lethal Triad of Trauma and how to avoid this deadly trap.

Presenter: Jared Alden, Lieutenant, Akron Fire Department

Date and Time: Saturday, July 14, 2:00 PM – 3:30 PM

Location: Magnolia Room

Cardiovascular & Chemical Exposure Risks in Modern Firefighting

The proposed class will provide an overview of recent research conducted at Underwriters Laboratories (UL) and the National Institute of Standards and Technology (NIST) as it pertains to fire behavior, ventilation and building construction. The Modern Fire Environment has changed from the environment encountered by the fire service just twenty years ago. The fuel package in today's residential occupancy has experienced a wide spread inclusion of synthetic products that produce a very different burning characteristic than natural materials. This fuel package has created a fire scenario that produces an increased heat release rate producing an increased risk to fire fighters. This fire environment has also created a more dramatic impact on the structural elements of today's structures. We will also examine the changes in today's construction practices and how today's fires will impact the structural integrity of the fire fighter's work environment. This presentation will also cover the recent tests conducted at the Illinois Fire Service Institute, who in collaboration with UL FSRI, NIOSH and Skidmore College, studied the cardiovascular impact of various firefighting assignments and the exposure to the carcinogenic elements. Dr. Kenny Fent, of NIOSH, will review exposure and contamination findings of the study. Dr. Fent will review the elements measured within the atmosphere, the fire fighter's PPE and the operating fire fighter. During the class we will cover the various aspects of fire behavior, building construction and the impact of ventilation on fire behavior. We will also bring it together and discuss how this new understanding of the modern fire environment impacts fire fighter operations. As situations develop in complicity it is important to remember the basics. The research is not indicating everything the fire service has done is wrong, in fact it is driving us back to our basics to our foundation. To operate effectively and safely on the fireground, fire fighters and fire officers must remember the basics, or ABC's, of fire fighter and they are the Three C's, Communication, Coordination and Control. If we can follow these basic tenants we can improve fire fighter safety on the fireground.

Presenter: Sean DeCrane, Battalion Chief, Cleveland Division of Fire; Dr. Kenneth Fent, Research Industrial Hygienist, National Institute for Occupational Safety and Health; Gavin Horn, Director of Research, Illinois Fire Service Institute at the University of Illinois

Date and Time: Sunday, July 15, 8:30 AM – 4:00 PM

Location: Juniper B&C

Drawing a Line in the Sand on Home Fire Fatalities

The presentation examines the home fire fatalities issue nationally and in Ohio and focuses on the problem of non-working smoke alarms. We look at why alarms fail, what can be done to increase the number of working alarms, where they should be installed and the latest alarm technologies, including 10-year sealed batteries and wireless interconnected alarms. This presentation moves fast and includes several videos.

Presenter: Neal Zipser, Community Affairs Manager, Kiddie

Date and Time: Saturday, July 14, 8:30 AM – 10:30 AM

Location: Regent 1

Dr. John Maxwell's 21 Irrefutable Laws of Leadership

This intensive 3-day program will take participants through the 21 Irrefutable Laws of Leadership as they apply to today's fire service. The program will challenge participants to look closely at themselves and identify ways to become a more influential leader in their organizations. It is intended for current officers and senior firefighters preparing to assume leadership roles in their department. The Maxwell Program requires a significant commitment as it involves multiple application assignments to be completed post class. You will be assigned a program mentor who will help you develop all 21 skills that Dr. Maxwell has identified as key leadership traits.

Presenter: Chief George Brown, OFE; Retired Chief Jim Steele, OFE; Retired Chief R. Mike Warner, OFE; Chief John Hickey, OFE, OFC; Chief Vince Harris, OFE

Date and Time: Friday, July 13-15, 8:00 AM – 5:00 PM

Location: Juniper A

Expect the Unexpected During a Natural Gas Emergency

Preparedness and quick action during a natural gas emergency can save lives and help minimize property damage. This session will discuss the number one cause of natural gas emergencies, natural gas properties, the roles and responsibilities of fire departments and the utility during an emergency, and valve and cross bore do's and don'ts. Steve Sylvester will lead participants in simulated emergency response drills, share real-life emergency scenarios and detail fire schools and other emergency response activities offered at Columbia Gas of Ohio's state-of-the-art Training Center. Session attendees will also learn how their departments can become natural gas safety advocates within their communities.

Presenter: Steve Sylvester, Vice President & General Manager of Field Operations, Columbia Gas of Ohio

Date and Time: Saturday, July 14, 3:45 PM – 5:15 PM

Location: Westerville Boardroom

Firefighter Safety: Mistakes & Best Practices

This program looks at a summary of 10 common mistakes and 10 best practices discovered from the presenter's extensive evaluation of more than 500 near-miss reports and line-of-duty casualty investigations. Improve your understanding of what's killing firefighters at incident scenes and how to improve fireground safety. During this fast-paced program we will look at the role staffing, communications, command activities, size-up, strategy, standardized procedures, training, near-miss events and post incident evaluations play in best practices and common mistakes.

Presenter: Dr. Richard B. Gasaway, Gasaway Consulting Group, LLC

Date and Time: Saturday, July 14, 2:00 PM – 5:00 PM

Location: Regent 1

Fireground Responsibility

In this program Chief Salka takes a critical look at the line-of-duty death of a firefighter and the many contributing factors that played a role in the event. Using the report issued by NIOSH after their investigation, each of the factors, events and decisions related to this fire are examined to discover if anything could have been done differently with more positive results. Issues such as SCBA usage, accountability tactics, risk vs reward decision making, survival skills and communications are all discussed and debated to uncover the real cause of the LODD and the possible actions and decisions that can be made in the future to prevent another similar tragedy. This program contains lessons and skills that apply to all ranks and levels including firefighters, company officers and chiefs.

Presenter: John J. Salka, Jr. Battalion Chief (ret.), FDNY/Fire Command Training

Date and Time: Thursday, July 12, 1:00 PM – 4:30 PM

Location: Regent 1

Fire Safety During Construction and Renovation

Throughout the nation, structure fires occurring in buildings under construction, renovation, or demolition have caused over 300 million dollars in direct property damage, and countless man hours lost. During this presentation we will look at the top contributing factors to ignition, the precautions to take so a fire will not occur, the owner's responsibility for fire protection, and the fire departments role during this process.

Presenter: Kenneth Klouda, Chief, Fire Prevention Bureau, Division of State Fire Marshal

Date and Time: Friday, July 13, 4:00 PM – 4:45 PM

Location: Juniper B & C

Fire Station Construction What Does it Take to Complete the Project

Moderated by Chief John Soisson, the architects that are present at Conference will hold a panel discussion on how to build a fire station.

Presenter: Architects of the Conference; Chief John Soisson, Moderator

Date and Time: Friday, July 13, 3:30 PM – 5:00 PM

Location: Magnolia Room

Five Alarm Leadership

Five Alarm Leadership is a dynamic program that is designed to energize and motivate the people in your department to perform and excel in everything they do. This program outlines many of the common situations that fire departments and fire companies find themselves in and presents suggestions and solutions to those situations. Chief Salka, a 33 plus year veteran of the FDNY has experienced many of the challenges and hurdles that your fire department is facing. He has learned through his experience as a lieutenant, captain and chief how to treat people, how to motivate them and even how to discipline them so that they want to come back for more. Issues such as integrity, inspiration, interest, Innovation, insight and initiative are all discussed and applied to life in the firehouse and on the fireground. Join Chief Salka as he guides you through your most difficult but vital role as a leader in the fire service.

Presenter: John J. Salka, Jr. Battalion Chief (ret.), FDNY/Fire Command Training

Date and Time: Thursday, July 12, 8:30 AM – 11:45 AM

Location: Regent 1

Flawed Situational Awareness: The Stealth Killer of First Responders

Situational awareness is one of the leading contributing factors for near-miss and line-of-duty deaths among first responders operating at emergency scenes. While organizations have worked to improve policies and procedures, equipment and training, the number of responder casualties has remained virtually unchanged. If we are going to reduce responder casualty incidents, we must first improve our ability to develop and maintain situational awareness under stress. This program provides the attendee with a thorough understanding of situational awareness - what it is, how challenging it can be to develop and how easy it can erode.

Presenter: Dr. Richard B. Gasaway, Gasaway Consulting Group, LLC

Date and Time: Sunday, July 15, 8:30 AM – 11:30 AM

Location: Regent 1

Introduction to Supporting the Organization: A Leaders Role

Supporting the Organization: A Leaders Role is designed for those who want to brush up on modern leadership issues and for those preparing to take a leadership role. The course exposes participants to some of the most frequent leadership topics faced by members within the fire service and public safety or emergency management organizations. This presentation includes a workbook, group discussion, and sharing of experiences through structured interaction. All issues are supported by humorous video examples that drive home points. Some concepts are derived from: 7 Habits of Highly Effective People, Crucial Conversations, Character First, Getting to Yes, The Myth of Excellence, Sun Tzu the Art of War, and Jesus-CEO.

Presenter: Wayne Senter, Executive Director, Washington State Fire Chiefs

Date and Time: Saturday, July 14, 3:45 PM – 5:15 PM; Sunday, July 15, 8:30 AM – 4:00 PM

Location: Regent 1 (Saturday); Regent 3 (Sunday)

ISO and Your Fire Department – Positive Community Impacts

This class will give insight into how the ISO Public Protection Classification system works and how it can have a positive impact on the communities your fire department serves. Emphasis is placed on fire department public fire suppression efforts and how this relates to community fire insurance ratings. Participants will learn how building community support for enhanced public fire suppression capabilities can produce positive results in the life and property saving services being provided, along with improving the insurance rating.

Presenter: Joe Fratantaro – Manager, Community Hazard Mitigation Services and Tom Rampe, Senior Field Representative

Date and Time: Saturday, July 14, 2:00 PM – 3:30 PM

Location: Worthington Room

NFIRS in Five Easy Steps

There are five essential questions to ask yourself when filling out the National Fire Incident Reporting System (NFIRS) report. This session will cover what those questions are, the importance of quality

incident coding, and will break down the NFIRS codes for better understanding. The session will provide clarification on common errors in reporting and commonly miscoded incidents, along with a walkthrough and digital download of the [NFIRS Complete Reference Guide](#) to quickly code incidents. There will be examples provided that allows the attendees to try their hand at coding an incident.

Presenter: Anita Metheny, Assistant Chief, Fire Prevention Bureau, Division of State Fire Marshal

Date and Time: Saturday, July 14, 8:30 AM – 10:30 AM; 3:45 PM – 5:15 PM

Location: Magnolia Room (AM); Worthington Boardroom (PM)

Ohio Assist Program

Critical and traumatic incidents can have varied and long-reaching impacts on a public safety agency, at all levels. Some could be dealing with the incident itself, injury or worse to a friend and or co-worker but chief executives have additional issues, not shared by others within the department. In addition to the effects felt by other members of the agency, chief executives often have the added responsibilities of the media, staffing coverage, and benefits for the employee or their family, addressing operational and administrative questions regarding the incident, response to the incident and any subsequent fallout. Chief executives also have to address questions and concerns from governmental agencies tasked with overseeing public safety in their jurisdiction. Sometimes these folks may be unknowledgeable about the work we do, the dangers we face and the toll it takes on our personnel. Many command level officers feel they must maintain a visual image for their agency as a whole and not allow themselves the chance to acknowledge their own reactions to these incidents. Given the paramilitary culture of public safety, sergeants don't ask chiefs if they are OK. Just not something we have done in the past. These incidents could include; the death or serious injury of any member of the agency, (either on or off duty), serious illness, use of deadly force by or against an officer, mass casualty, death involving children or older folks, or anything that overwhelms their personnel's ability to cope. *After the Call* was created to provide chief executives with some ideas, concepts and techniques they might use to help themselves during a critical or traumatic incident. We also want to let these officers know that, just like the rest of their agency, they are having a normal reaction to an abnormal circumstance. It's not only ok to ask for assistance, it will help ensure that they are able to provide the guidance and oversight to help their agency and it's personnel work through the aftermath to be stronger than before the incident happened.

Presenter: Lieutenant Steven M. Click; Ohio ASSIST Program; Ohio State Highway Patrol

Date and Time: Sunday, July 15, 8:30 AM – 4:00 PM

Location: Westerville Boardroom

Ohio's Flooded Roadway Law: Testing the Waters

Ohio's Flooded Roadway Law, named in honor of Fallen Wellington Fire District Diver Allan Anderson Jr. was signed into law in December of 2014. To date, very little seems to be known about the law, which poses stiffer penalties for drivers who ignore Road Closed signs and travel into high water. This informational class will cover the events leading to a LODD prompting the introduction of Senate Bill 106, an explanation of ORC 4511.714, the required signage, as well as the actions taken to make an entire County aware of the law and how to enforce it.

Presenter: Mike Wetherbee, Chief, Wellington Fire District

Date and Time: Friday, July 13, 3:30 PM – 5:00 PM; Sunday, July 15, 8:30 AM – 10:00 AM

Location: Lilac Room

On-Scene Grief Training for Battalion Chiefs and Company Officers

The Ohio Federation of Fire Chaplains (OFFC) supports the ministries of volunteer and paid Fire Department and EMS Chaplains, and assists fire service agencies in developing their chaplaincy programs. The OFFC is affiliated with and supports the Federation of Fire Chaplains (FFC) on the national level, providing automatic membership and networking with the addition of a statewide certification and accountability system for fire & EMS chaplains. The OFFC offers programs that provide its members with educational opportunities in training conferences and materials. The OFFC provides a standard of care and training for Chaplains.

Presenters: Reverend Kevin M. Kellogg, Chaplain 591, Violet Township Fire Department; Dr. Paul Zeeb, MD, FACEP, Mount Carmel East/West/Grove City Hospitals and Diley Ridge Medical Center; Battalion Chief William D. McCullough, Jefferson Township Fire Department; Reverend Gunnar Cerda, OhioHealth Grant Medical Center, Freestanding Emergency Departments, and Ambulatory Services; Megan Kale-Cheever, LSW, CT, GC-C, Mount Carmel Hospice and Palliative Care

Date and Time: Saturday, July 14, 2:00 PM – 5:00 PM

Location: Lilac Room

Preparing for Your Climb Down the Ladder of Success

The first baby boomers turned 65 in 2011 and there are an estimated 75 million of them, including first responders who are fast approaching an age where voluntary or mandatory retirement looms. It is surprising – if not sad- that so many of our brothers and sisters spend a third or more of their adult life so intently focused on serving others that they have not given much thought or concern to what they'll do if/when they are no longer a public servant. While it may appear to be logical for those in their 40's and 50's to start thinking about life after public service, this program will share why so many are not adequately prepared physically, emotionally, functionally, or financially for the “afterlife” and it can cause some really big problems. And these problems can become even more challenging if the transition is sudden or unexpected (e.g., injury, illness, termination). This program is designed to help you depart with a plan, whether you're retiring, disabled, downsized, or terminated.

Presenter: Dr. Richard B. Gasaway, Gasaway Consulting Group, LLC

Date and Time: Saturday, July 14, 8:30 AM – 10:00 AM

Location: Regent 2 & 3

Presentation on How FDNY Recovered from 9-11

9-11 changed the way we lived and will be a day forever remembered in the fire service industry – and especially for the FDNY. Sal Cassano will discuss the impact of 9-11 on the department he oversaw, what lessons were learned, and most importantly, how the department and city moved on. While there was a focus to rebuild, the FDNY made sure that it increased interaction with the public and placed a renewed emphasis on fire prevention and education.

Presenter: Sal Cassano, former FDNY Commissioner

Date and Time: Saturday, July 14, 8:30 AM – 10:30 AM

Location: Regent 1

Safety, Health and Wellness Open Discussion

Part I - Update SB 27 - Reviews details of bill; Discuss 742.38 – Pension Fund and 4123.57 – BWC; discuss Inclusion and exclusion criteria; discuss the IARC – International Agency for Research on Cancer; Groups 1a, 2a, (2b dropped from law); Discuss claim and disability processes; leave / time off; cancer prevention – best practices. **Part II** - Behavioral Health; PTSD Bill; Discuss causes occupational internal / external; review symptoms; support systems / resources; use of EAP; check list; administrative policies; leave / time off / best practices.

Presenter: Karen D. Turano, Esq., Associate, Connor, Evans & Hafenstein LLP

Date and Time: Saturday, July 14, 3:45 PM – 5:15 PM; Sunday, July 15, 1:00 PM – 3:00 PM

Location: Juniper B & C (Saturday); Magnolia Room (Sunday)

Single Engine Residential Fires (SERF): The Critical First 10 Minutes

The first 10 minutes on the fireground is what determines the eventual outcome. How you perform during The Critical 10 minutes is directly related to prior training and preparation. This training usually focuses independently on hose selection, search, forcible entry, ground ladders and ventilation. Incident Command training rarely leaves the training room. We often neglect to actually combine all of those pieces together, and very rarely do these global training sessions occur during realistic live-fire training. This class has been very successful at BGSU Fall Fire School for the past 7 years with very positive student feedback. This classroom session will introduce you to the SERF program and challenge you to take a good look at how you operate on the fireground. It will cover fire behavior, how to apply UL/NIST information to the street, leadership on the fireground, company level training, size-up, radio traffic, overhaul, and will review live-fire evolutions conducted in past SERF classes.

Presenter: Kevin McFarland, Lieutenant, Violet Township

Date and Time: Friday, July 13, 3:30 PM – 5:00 PM; Sunday, July 15, 3:15 PM – 4:45 PM

Location: Regent 1 (Friday); Magnolia Room (Sunday)

So You Want to be a Fire Chief?

This two hour presentation is packed full of valuable information to help fire officers decide whether or not they want to become a Fire Chief. Chief Leininger is a dynamic speaker. He will facilitate an open discussion about the pros and cons of being a Fire Chief. The attendee will learn about the things that are required knowledge to be an effective and efficient Fire Chief in today's environment and into the future.

Presenter: Robert Leininger, Chief, Springfield Township Fire Department

Date and Time: Saturday, July 14, 3:45 PM – 5:30 PM; Sunday, July 15, 1:00 PM – 3:00 PM

Location: Regent 3 (Saturday); Magnolia Room (Sunday)

Tactical EMS

Some departments have SWAT medics but others do not. Tactical medicine is growing due to the number of shootings which have occurred frequently in the U.S. Police entry teams (Contact Teams) have and are being developed as I write this email to neutralize the shooter. Rescue Task Force (RTF) teams are also used where two medics enter a warm zone to treat & triage the wounded with a few PD officers used as security. This presentation will give a history of TEMS and discuss the preventable injuries associated with the tactical setting. Also discussed is how a SWAT run is activated, implemented, briefed, operated, concluded, and debriefed. We will focus largely on the role of the medic, not solely in regard to trauma, but also related to the medical aspect of keeping the operators

functioning in austere environments. A Medical Threat Assessment (MTA) must be formulated by researching, analyzing, and implementing a medical plan. The best medicine in the tactical setting is great preparation but great medicine at the wrong time can equal terrible tactics and a failed mission. Our mission in Akron is to catch the bad guy and go home to our families. Tactical medicine is a key component to the safety of all involved when a planned raid is enacted or when a Signal 100 occurs.

Presenter: Jared Alden, Lieutenant, Akron Fire Department

Date and Time: Saturday, July 14, 3:45 PM – 5:15 PM

Location: Magnolia Room

The 4 R's of Responding to Oilfield Emergencies (Recognition, Roles, Responsibilities, and Resources)

This presentation will provide information and an overview of OOGEEP's *Responding to Oilfield Emergencies* Fire Training that is provided "free of charge" to Ohio's fire service. That training helps ensure that firefighters are situationally aware and understand the **Recognition** of both emergent and non-emergent circumstances specific to natural gas and crude oil exploration and production in Ohio. Other important topics include establishing a unified incident command structure and the **Roles and Responsibilities** of all parties involved in a potential incident. A practical exercise will be conducted to allow participants an opportunity to use numerous **Resources** for chemical identification used in the industry and fire service.

Presenter: Charlie Dixon, OOGEEP Safety and Workforce Director; Chief Brent Gates, New Concord Fire Department

Date and Time: Saturday, July 14, 2:00 PM – 3:30 PM

Location: Juniper B & C

Understanding ISO's Public Protection Classifications

This class provides an overview of how the ISO Fire Suppression Rating Schedule (FSRS) is used to classify your community's public fire protection delivery system. From Apparatus to Community Risk Reduction programs, participants will learn the many fire protection features included in the community grading process. Participants will discuss the elements used to classify a jurisdiction's fire defense system. Learn about information available to Fire Chiefs that ISO uses in the evaluation, and where to go in ISO for help. Information provided can be used to improve your community's ISO Public Protection Classification. There will be time reserved for questions and answers.

Presenter: Joe Fratantaro – Manager, Community Hazard Mitigation Services, Insurance Services Office, Inc. and Tom Rampe, Christian Ball, and Andy Welsh, Field Staff, Insurance Services Office, Inc.

Date and Time: Thursday, July 12, 9:00 AM – 4:00 PM

Location: Lilac Room

Volunteer Recruitment Best Practices

After saving lives and property, one of the most difficult challenges volunteer fire departments face is recruiting and retaining quality members. Time demands, training requirements, increasing call volumes, leadership problems, legal mandates, internal conflict, time management, rewards and recognition, mobile workforce, cost of housing, aging communities...the list goes on and on. This two-part program focuses on best practices to help you attract and retain quality members. We will look at: Leadership styles, mission, vision, core values, officer selection criteria, communications, teamwork,

conflict resolution, recruitment practices and retention strategies. The presenter has worked with volunteer firefighters for 30+ years. He is co-author of The Leadership Guide to Volunteer Fire (Jones & Bartlett Publishing), and the author of On Fire About Leadership (self-published).

Presenter: Dr. Richard B. Gasaway, Gasaway Consulting Group, LLC

Date and Time: Sunday, July 15, 1:00 PM – 3:00 PM; 3:15 PM – 5:15 PM

Location: Regent 1

What's Your Comfort Level

Firefighter health and wellness has long been a topic of discussion for many within our ranks. Yet, for far too many others, firefighter health and wellness is either assumed or “purposely” dismissed. Today, with the rise of occupational exposures, PTSD, firefighter suicides, and the ever-present cardiovascular risks within the fire service, it's time we have the uncomfortable conversations. This high impact, high-energy address will explore the causes of our discomforts, shed new light on the opportunities available and the responsibilities we all bear in making health and wellness of our members and ourselves priority one. What's your comfort level, and just how uncomfortable are you willing to be?

Presenter: Timothy E. Sendelbach, Editor-in-Chief, Firehouse Magazine/Firehouse.com

Date and Time: Monday, July 16, 8:30 AM – 11:00 AM

Location: Regent 2 & 3

When Suicide Hits Home: Unexpected Challenges Following an Unexpected & Tragic Event

While we have come a long way in raising awareness about the prevalence of suicide in the fire service, we still don't expect it to hit close to home. This session will look at the signs and red flags leading up to the event, the short and long-term effects on department operations and culture, the lingering conflicts and friction among department members, and the resulting initiatives and policies following the loss of one of our own.

Presenter: Chief Jerry Winkler (Ret.), EFO, CFO, OFC and Captain Tammy Johnson, Seville-Guilford Fire & EMS Department

Date and Time: Sunday, July 15, 10:15 AM – 11:45 AM; 3:15 PM – 4:45 PM

Location: Magnolia Room (AM); Lilac Room (PM)

Location: Juniper B & C

FEATURED PRESENTERS

Alden, Jarred - Jarred Alden is a graduate of Kenton Ridge H.S. (1993); Urbana University (1997) B.A. degree; and Wright State University (2000) M.A. degree. His focus in college was psychology, sociology, law and applied behavioral sciences. He have worked for The Akron Fire Department for 14 1/2 years and 2 years of this time as a Lieutenant. Alden has also served as a diver for the water rescue team and he currently functions as a tactical medic for The Akron Police Department's SWAT team. Alden is currently stationed at station #14A in Goodyear Heights in Akron. Before joining AFD, Alden worked for Infocision Management Corporation as a Program Supervisor and the University of Akron as a sociology instructor. He instructed on topics such as research methods, basic statistics, culture, social structure/processes, social networks, socialization, deviance, crime, politics & economy, terrorism, education, gender, race and collective behaviors.

Carney, Brandy - Brandy Carney is the Director of Public Safety & Justice Services (PSJS) for Cuyahoga County, in Cleveland Ohio. PSJS is made up of seven divisions which include the County 911 Dispatch Center (CECOMS), Office of Emergency Management, Criminal Justice Information Services (CJIS), Grants and Fiscal, Witness Victim Service Center, Administration/ Project Management and the Northeast Ohio Regional Fusion Center (NEORFC). She manages the department's day-to-day operations, including a budget of over thirty-five (35) million dollars made up of grants, general fund and other revenue sources, and works closely with all divisions to make sure they are functioning at the highest level possible and supporting the mission of the County Executive and County Council. PSJS supports needs of public safety and criminal justice organizations throughout the County, providing a myriad of services including fiscal, grant administration, policy and project management, to over 60 law enforcement agencies and 52 fire departments within the 59 communities in Cuyahoga County.

Cassano, Sal – Salvatore J. Cassano served as the 32nd Fire Commissioner in the 151-year history of the New York City Fire Department (FDNY), leading the United States' largest fire department with more than 16,000 fire, EMS and civilian members, and an annual budget of \$1.6 billion. Commissioner Cassano spent over 44 years in the FDNY and held every uniformed rank prior to his appointment by Mayor Michael R. Bloomberg in January, 2010. Commissioner Cassano served as the FDNY's Chief of Department-the highest-ranking uniformed officer-from 2006 through 2010, overseeing many of the agency's most important bureaus including Fire and EMS Operations, Training, Safety, Fire Prevention and Communications. From 2001 to 2006, he served as Chief of Operations-a position to which he was appointed immediately after Sept. 11, 2001. Both as Chief of Operations and Chief of Department, Commissioner Cassano played a crucial role in rebuilding the Department in the wake of Sept. 11 and the loss of 343

members of the Department. In the years that followed, more than 6,800 new firefighters were hired and more than 6,000 others were promoted to various officer ranks as the Department went through a difficult but remarkable resurgence. Under his leadership, the FDNY became better equipped, trained and prepared than ever before in its history, and achieved unprecedented success with the fewest civilian fire fatalities ever and the fastest response times on record. Commissioner Cassano's career with the FDNY began with his appointment as a firefighter on Nov. 29, 1969. He steadily rose through the ranks with promotions to lieutenant (August 1977), captain (April 1984), battalion chief (August 1987), deputy chief (June 1993), deputy assistant chief (November 1999) and assistant chief (April 2001). Five times during his career he was cited for bravery. Prior to joining the FDNY, Commissioner Cassano served in the U.S. Army from October 1965 through July 1967 and was deployed to Vietnam in September 1966. While a firefighter, he attended John Jay College of Criminal Justice and received a Bachelor of Science degree in Fire Science. Commissioner Cassano also received an Honorary Doctor of Laws Degree from St. John's University in May, 2013. In September 2009, Commissioner Cassano was awarded France's highest decoration, the Legion D'Honneur by French President Nicolas Sarkozy. Commissioner Cassano grew up in Brooklyn and is a lifelong resident of New York City. He and his wife, Theresa, reside in Staten Island. They have five children and eight grandchildren.
